DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a credible asserted utility or a well-established utility.

It is old and well known that a mixture of red, green and blue light when mixed and synthesized produces white light however, the claim then further claims that "the light is illuminated sequentially at different timings for each color so that every two of the self-luminous sources overlap" this process cannot produce white light since all three colors are required to produce the white light and according to the claims only two colors of the lights are illuminated together overlapping.

Claim 1 is also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a credible asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Art Unit: 2875

Claims 2-4 are rejected because of its dependency upon claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahayashi (US 6,573,882) show picture display method using liquid crystal device having a primary colors of red, green and blue that mixed an synthesized to produced white light.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
